

CORPORATE ENVIRONMENTAL AND NOISE POLICY STATEMENT

It is the policy of the board of directors of Dragages et Travaux Publics (HK) Ltd. to do at all times what is necessary to comply with the legislation related to the environment and in particular with the Noise Control Ordinance, and to strive for the improvement of environmental conditions in all areas under its control. The Company is therefore committed to establish, to maintain and to operate a management system, as part of its ISO 9001 certified Management System, for the purpose of ensuring that

- legislative and contractual requirements, customers' and public expectations are adequately understood and taken into account in project planning and execution;
- responsibilities, duties and authorities of persons concerned in the Management System are clearly assigned and controlled;
- risks of infringement of environmental and noise emission requirements related to the Company's activities are identified, preventive measures are designed and implemented;
- relevant environmental objectives are set at the beginning of each project, the degree of achievement regularly measured, and adequate steps are taken to improve the results where required;
- the efficiency of the Management System is reviewed regularly by those responsible for its implementation, and corrective actions are implemented as to achieve a continuous improvement;
- infringement of environmental and noise emission requirements, and non compliances with the Management System, are systematically reported, analysed and measures taken to avoid re-occurrences.

This policy shall form the basis of all the Company's undertakings affecting the environment and the generation of noise. It is to be explained to all employees and subcontractors who will be required to ensure its implementation.

Luc Messier
Managing Director
